# HUMAN RESOURCE INFORMATION SYSTEM

Human Resource Information System (HRIS) is an emerging area that is leading human resource management into a new era. It uses the information technology developments and features for effective functioning of the HR processes. The HRIS contains tools that allow users to input new data and edit existing data. In India, human resource information system is in the developmental stage, as compared to developed countries.

This book attempts to analyze the outcome of Human Resource Information System implementation in Public Sector Banks in India. Making a critical assessment of the impact of HRIS in Public Sector Banks in the country, it tries to explore the important factors that lead to success of HRIS implementation. Highlighting the major impediments in the implementation of HRIS, it also offers suggestions for the successful implementation of HRIS.
