Ideas to make your perfect Master and Children's Bedroom to summer

Master Bedroom: The bedroom is an extremely private space in a house when you relax and rejuvenate, which is important to pay more attention to this space. To create a relaxed and soothing space, you can go for soft pink mixed with earthy neutrals and warm tones of gold and give it an elegant look. Add simple wooden furniture and rich patterned fabrics to complete the room's look.

Vibrant children's room: While kids like to spend their time outside with friends during summer holidays, they also spend a lot of time at home doing holiday homework. It is imperative to surround them with a combination of colours which complements their vibrant energy levels. Using light pastels will create a cooler look and help children feel enthused even indoors. Also, children's room have a lot of scope for accessories, so you can add a mini desk, blackboards and maps to keep them inspired and add to the playfulness of the room.

Green Spaces & Indoor Plantation

The summer season is coming so we will talk about how to decrease the temperature of our home or indoor spaces. By the help of indoor plantation we can create green space. In our indoor spaces like living room, balcony, kitchen etc. There are so much benefits of indoor plantation in summers reduce carbon dioxide levels, increasing humidity, reducing level of certain pollutants, such as benzene & nitrogen dioxide, reducing airborne dust levels, keeping air temperature down. Indoor plantation & gardening keep us stress free & busy. We can provide aesthetic & cool look to our indoor spaces. There is variety of indoor plants – Snake plant, Spider plant, Lucky bamboo, Weeping fig, Areca palm, Boston fern, Pathos, Baby rubber plant, Flamingo lily, Croton etc. We can place all these plants in our indoor or outdoor. We can place snack plant in corner because it grows more in dark space & consume less water so there is no chance of any dust or dirt in our balcony. We can grow hanging plants like money plant weeping fig & other if we have small balcony so we can do vertical gardening also because it is good idea to consume small space in living room, corridors and other indoor spaces. We can keep pots it will be good if we will use coco peat & terra cotta pots because if we grow plants in these pots so plants will be more health & happy. Clay pots is also looks cool & it is pollution free & ecofriendly. Kitchen garden is also very good idea of gardening we can grow vegetable & medicinal plants & use them in our daily life.

Earthenware Interior Cooling Lights

We've all had that in summer the temperature stay warm but how would you feel about tricks that can keep your home interior lighting cooler in summer. It helps you prevent the environment and to control temperature in summer.

- It is heatproof and cool proof and thus practicable for cooling lights.
- It is heat-resistant (any foam of clay that the kiln and glazed is bound to resist heat).
- It is cheaper, eco-friendly and unique shape and design.
- Switching over every single bulb in your home for some cooler light.
- Light than the cooler (blue, white) light of fluorescents and some led.
- Convection transfer of heat is very slow and much user than through solid mass, it reduces heat temperature.

Best fabric for summer to control room temperature and make you feel relax and comfortable

- We can use **COTTON FABRIC** bed sheets because it is the first and the most preferred fabric and it makes the air circulation easy letting you go cool and calm during hot days.
- We can use **KHADI FABRIC** for curtains, it is the Mahatma Gandhi's ignited fabric and it is the best fabric for summer and offers seething and cooling effect.
- We can use **JUTE FABRIC** for home decor like: candle holder, lamps and placemats it is made of fibers that do not degrade with the sun explore.
- We can use **LINEN FABRIC** for table clothes and bedroom couch because linen is the lightest fabric and it allows air to pass through.
- We can use **RAFFIA FABRIC** as a wallpaper it is also good for summer season.
- We can use **SILK FABRIC** for cushions it is the lighter fabric to binge in the summer heat and the material is anti-allergic, lint free and prevents bacterial growth.

Some tips to keep our space cool on hot days:

- Facilitate cross ventilation
- Add some greenery
- Use Breathable curtains like jute
- The right fabric for e.g.- cotton
- Use cool colour paints and lighting
- Reduce the load of appliances
- Reduce the clutter which also helps to increase positivity
- Mud Ac - this is new invention by an architect where he used terracotta tubes which help to reduce ambient temperature without harming environment.

Plants that keep your house cool in summers

There are some plants that keep your homes and offices cool. And the plus point is these plants require less water as well as less maintenance. Whenever we talk about the plants that keep our home cool, the first plant comes in our mind is aloe vera. If you have ALOE VERA in your house, it will not only keep your house cool, but will also provide you with fresh aloe vera gel for treating nasty sunburns. It lowers the air temperature of your house and protects the house from overheating. You can use this plant in indoor and outdoor. In interior designing, aloe vera plant is used for making your house places beautiful. FICUS TREE is also popular from their great benefits, it helps in air temperature cool as well as reduces air pollution and improve the quality of air in your home. FERN plant helps to not only cool and humidify the air, but alike aloe vera, it is essential for cleaning formaldehyde out of the air. It is one of the most effective air-purifying plants among all. Another plant is GOLDEN POTHOS, this plant is a great plant as requires little care, and it will keep your air cool and purified. If we talk about the plant which is best for your bedroom, that is SNAKE PLANT, as this plant doesn't take any oxygen away, especially at the night time. It emits oxygen and keeps your room cool and fresh. In interiors, the plant which is widely use for the decoration purpose is ARECA PALM TREE. It is also popular living room plant and it acts as a natural air humidifier. In addition to cooling off your home, the areca palm helps in removing benzene, formaldehyde, and trichloroethylene from the air.
