Guidelines Choice Filling [CUET (UG) – 2025]

In CUET (UG) 2025, choice filling involves selecting your preferred Institute / Department and programs in order of preference, and then locking those choices before the deadline. After logging using your CUET application ID and other details, you'll be able to add multiple options and arrange them in a priority list. It's crucial to lock your choices before the deadline to ensure they are considered during seat allotment.

Here's a more detailed breakdown:

1. **Login:** Access your account using the CUET application ID and other details.
2. **Select Preferences:** Choose the institute and programs you're interested in and arrange them in order of preference. Before locking the preference, read carefully the eligibility of respective programs.
3. **Lock Choices:** Ensure you lock your choices before the deadline, as failing to do so you will be not considered for allotment of programs.
5. **Multiple Choices:** It's recommended to select as many preferences as possible to increase your chances of getting a seat as per the eligibility.
6. **No Limit on Choices:** You can add as many choices as you want, but prioritize them carefully.
