*NPCI Mapping: Mapping is a process of associating a Bank with Aadhaar number which is facilitated by NPCI for Direct Benefit Transfer to the respective Bank who have linked the Aadhaar Number to a specific Bank account for receiving Direct Benefits to which customer has given the consent.
Aadhaar seeding process

Seeding is necessitated for receiving Direct Benefit Transfers (DBT) provided by Government schemes. The following is the process flow of Aadhaar seeding:

1. Customer to visit the bank branch where he/she is holding an account and submit the duly filled consent form – Annexure I.
2. The bank officials after verifying the details and documents provided (as may be required) and authenticity of the customer based on the signature will accept Aadhaar seeding consent form and provide an acknowledgement to the customer.
3. The branch will then link the Aadhaar number to the customer’s account and also in NPCI mapper.
4. Once this activity is completed and Aadhaar number will reflect in NPCI mapper.

Role of the customer:

1. Submit the consent form with complete details either in physical or electronic form as per the facility provided by his/her bank.
2. In case of moving Aadhaar number from one bank to another bank, the customer should provide the name of the bank from which the Aadhaar is being moved.
3. In case of physical form, the consent form should be duly signed as per the bank records.
4. After seeding is completed the customer may approach their Gas service provider (Oil Marketing Company) for the pending subsidy amount.
5. For non-receipt of subsidies customer to approach respective OMC’s through their toll free number: 1800 2333 555.

Role of the Bank/Branch:

1. Verifying the completeness of the consent form, checking the documentation and authenticating the customer’s signature.
2. After the officials are satisfied with the documentation they should carry out the following activities:
   a. Linking the Aadhaar number to the bank account (in CBS)
   b. Updating NPCI mapper

   Note: By linking the Aadhaar number to the account the branch is not updating the mapper. The mapper update process has to be followed by their central team or IT division as the case may be.
3. After the mapper files are uploaded the response files received from NPCI have to be verified.
4. In case of failure in updating any Aadhaar number/s then necessary corrective action has to be taken and CBS also should be updated accordingly.

Role of NPCI:

1. Mapper is a platform provided by NPCI for the banks to update or remove Aadhaar numbers as per their customer's request.
2. The activity of updating or removing an Aadhaar number from mapper can be performed only by the banks.
3. NPCI on its own does not update the mapper records.
4. In case customer approaches NPCI for grievance redressal, NPCI will have to reach out to the teams concerned in banks for necessary action.
